

**Clarification # 1**

**NCB No: CRIP 8416-BZ/2017/NCB/G7A**

**G7A: SUPPLY AND DELIVERY OF ONE ALUMINIUM WORK BOAT  
AND ONE TRAILER TO ACCOMMODATE WORK BOAT FOR  
MINISTRY OF WORKS (MOW), BELMOPAN**

**November 16, 2017**

<b>No.</b>	<b>Clarification Requested</b>	<b>Response</b>
1	<b>Size:</b> We note that the classified length of this boat can be as much as 44', therefore given the requirement asks for a width of 10' with 36" sides, please confirm a maximum overall width of 16 foot would also be acceptable.	The boat has to navigate some narrow channels and from time to time relocated using the highways, hence the 10' width. Wider than 10' is not acceptable.
2	<b>Engines:</b> We note the requirement asks for triple power plants at 380HP providing a total power of 1140HP. However in providing simpler and more cost effective maintenance requirements along with providing more room in the engine bay, we would ask if twin 600HP engines providing a total power of 1200HP exceeding the power requirements would also be acceptable.	Requirements for engines remain as In board out board Motor ( 6.7L /380HP diesel Engine or equivalent, Triple MIP ultra-jet 305HT water jets or equivalent)
3	<b>Trailer:</b> With reference to the requirement of the trailer, we appreciate that as this is a large heavy vessel then transportation by trailer on the highway or road would be both difficult and restricted. Therefore we would ask the purpose of the trailer and will it simply be used for storage of the vessel and movement around an enclosed yard or port facility.	The trailer is for transporting the vessel on the highway when necessary as well as for the other mentioned activities. It has to be able to safely and easily carry out all the mentioned tasks.
